Annona Muricata  
(Soursop/Graviola)  
Soursop dried leaves 120gr (4oz)  

Method for Preparation:  

Daily Tea (decoction):  
- Shred 7 - 9 Soursop leaves in 6dl (3 cups x 2 dl) of cold water,  
- Boil the water,  
- Simmer the Soursop leaves for approx. 30 minutes  
- Let the Tea cool. Once cool, it is ready for drinking,  
- Repeat this process to drink the Tea daily.

30 Days Treatment (3 months + 3 months):  
- The treatment requires drinking the Tea 3 times a day, 2 dl (1 cup) BEFORE each meal. The Tea is better absorbed in the body, and more effective if taken 30 minutes before eating food.  
- The Tea is taken 3 times a day, 30 minutes before each meal, for 30 days. Despite its strength and potency, Soursop, targets only diseased cells, leaving healthy cells unharmed. However, please note; after 30 days, it may destroy or upset the good bacteria and balance in the stomach.  
- Recommended intake for 3 months, pause of one week and repeat for 3 months more.

Maintenance Dose:  
- After the disease has cleared, do not stop taking your treatment. You should then take the daily maintenance dose of one drink per day, 30 minutes before meals for 5 consecutive days each week.  
- Then let your body rest for 2 days of each week.  
- To remember your dosage and days easily, drink your tea from Monday to Friday and then rest on Saturday and Sunday.  
- How long should you take the maintenance dose? As long as you feel the beneficial effects of Soursop. For your own body's needs.

Caution:  
- Do not use during pregnancy and lactation.  
- The soursop is hypotensive (lowers blood pressure), vasodilator (widens blood vessels) and cardiovascular depression (decreased heart rate and contractility).  
- Do not use more than directed  
- Keep out of reach of children.

1 Bag (4oz) = 1 Month Treatment  
Recommended intake for 3 months, pause of one week and repeat for 3 months more.  
This is not a medicinal product
